

I) How to transfer files from Remote Linux server to Local windows system.

Open Winscp and enter the required details as shown

After logging, local system files and remote linux files will appear on both sides

Drag and drop the files to copy from remote server to local windows system and vice versa respectively.

II). From Linux Server to Local Linux System use scp command to copy or transfer files.

```
[locuz@master1 ~]$ scp testfile username@10.2.0.181:/location
```
